The hard working kidneys seem to require aid sooner than other internal organs. At middle age many men and women feel twinges of rheumatism, have swollen or aching joints and are distressed with sleep disturbing bladder ailments. Foley Kidney Pills are safe, prompt and can be depended on to give relief. For sale by Reed & Burnett.

BASE BALL DOPE.Burnett was in good form at Livingston in the last game Crossville played with Livingston. In the face of his erratic support he hurled masterful ball time and again he pitched himself out of yawning holes. He showed a rare combination of brains and ability and for the nine innings he held the Livingston boys to five scattered safeties—a feat which has been accomplished but twice before this season. A weird combination of errors at costly junctures robbed Baxter Burnett of a richly deserved shut out that afternoon. With proper support the Crossville hurler would have held his opponents scoreless.

The European war has made it necessary that America prepare herself to take care of practically the whole world, both financially and physically. Your efforts will pay you greater returns this year than ever before, and the press of the nation has joined us as one man in appealing to you to cultivate every available inch of ground. The universe is dependent upon your efficiency, your prosperity, and your progressiveness.

You are using improved machinery, because you can do your work better and more quickly with it, aren't you? If you can invest a few dollars in something that will save time and labor, you do it, don't you? If you have to leave your work for a day and go to town for something you could telephone for and have it sent you by parcel post, or to see about some other business matter which could be decided upon with a telephone conversation, haven't you lost both time and money?

Then why don't you equip yourself with dependable telephone service, the kind we are spending thousands of dollars a year on to keep in as near perfect condition as possible for your benefit. You can do it at a small cost and we are anxious to tell you how. Fill in the coupon below and mail it today.

I REMEMBER.

I remember, I remember, the house where I was born, the little window where the sun came peeping in at morn.

You'd hardly know the old place now, for Dad is up-to-date and the farm is scientific, from the back lot to the gate.

The house and barn are lighted with bright acetylene, the engine in the laundry is run by gasoline; we have silos, we have autos, we have dynamos and things, a telephone for gossip and a phonograph that sings.

The hired man has left us—we miss his homely face—a lot of college graduates are working in his place.

There's an engineer and fireman, a chauffeur and a vet., 'electrician and mechanic, Oh, the farm's run right, you bet.

The little window where the sun came peeping in at morn now brightens up a bath room that cost Dad a car of corn.

Our milkmaid is pneumatic and she's sanitary, too, but Dad gets fifteen cents a quart for milk that once brought two.

Our cattle came from Jersey and the hogs are all Duroc, the sheep are Southdown beauties and the chickens Plymouth Rock.

To have the best of everything, that is our aim and plan, for Dad not only farms it, but he's a business man.—E. F. McIntyre.

ALWAYS BEAR TO THE EAST

Objects Dropped Into "Bottomless Pits" Are Inevitably Attracted in That Direction.

Because the earth whirls so fast, rocks dropped into the very deep shafts of Michigan copper mines disappear on the way down. At some of the shafts, which are nearly a mile deep in a straight drop, it is the general belief that a load of broken stone can be dumped into the hole at the top without causing any injury to a man at the bottom.

On account of the motion of the earth a rock will not fall perfectly straight, but will bear to the east, lodging in the timber lining or perhaps bounding from wall to wall until it is broken up or caught by some projection.

A group of experimenters from the Michigan College of Mines verified this by careful tests with steel balls. One ball was hung by a thread over the hole, about four feet from the east side, and the thread burned. A clay box had been placed at the bottom of the shaft to catch the ball, but it never appeared. Another ball was then dropped, by the same method, a little farther away from the east edge, and this ball, also, did not get to the bottom. Careful search located the first ball imbedded in the timbers 800 feet down, but the second ball never has been found.

As the earth revolves the surface is moving eastward at a rate which varies with the latitude. Down in the earth the rate is not so fast, on the same principle that a point on the tire of a wheel revolves faster than one on a spoke. Consequently, at the distance of a mile below the surface the speed rate is less than at the surface. The falling ball, however, continues to move toward the east at the same velocity it had on the earth's surface.—Saturday Evening Post.

Her Patriotic Desire.

An English country vicar and his family received a visit from a wealthy but extremely plain-looking spinster relative, who announced her intention of taking up her residence at the vicarage for the period of the war, giving her reason for leaving her own abode the existence of a large military camp in its vicinity. As she has always been intensely patriotic the vicar ventured to inquire what objection she had to the presence of the soldiers. "Well," she replied, primly, "I have read Lord Kitchener's letter to his men as to how they should treat women, and I have come to the conclusion that the best way to assist them in carrying out his advice is to remove temptation from their path as much as possible."—London Mail.

Speech.

Speak not at all in any wise till you have somewhat to speak. Care not for the reward of your speaking, but simply and with undivided mind for the truth of your speaking.—Carlyle.

WHAT THE EDITOR GETS.

Some of It Is Nice and Some Would Be Classed Differently.

Consider the editor. He weareth purple and fine linen. His abode is among the mansions of the rich. His wife hath her limousine and his first-born sporteth a racing car that can hit her up in forty flat. Lo! All the people breaketh their necks to hand him money.

A child is born unto the wife of a merchant in the bazaar. The physician getteth ten golden plunks. The editor writeth a stick and a half and telleth the multitude that the child tippeth

the beam at nine pounds. Yea, he lieth even as a centurion. And the proud father giveth him a crown.

Behold, the young one groweth up and graduateth. And the editor putteth into his paper a swell notice. Yea, a peach of a notice. He telleth of the wisdom of the young woman, and of her exceeding comeliness. Like unto the roses of Sharon is she and her gown is played up to beat the band. And the dressmaker getteth two score and four iron men. And the editor getteth a note of thanks from the Sweet Girl Graduate.

The daughter goeth a journey and the editor throweth himself on the story of the farewell party. It runneth a column, solid. And the fair one remembereth him from afar with a picture postal card that costeth six for a jitney.

Behold, she returneth and the youth of the city fall down and worship. She picketh one and lo, she picketh a leuon. But the editor calleth him one of our most promising young men and getteth away with it. And they send unto him a bid to the wedding feast and behold, the bids are fashioned by Muntgummary Hawbuck, in a far city.

Flowery and long is the wedding notice which the editor printeth. The minister getteth ten bones. The groom standeth the editor off for a twelve months subscription.

All flesh is grass and in time the wife is gathered into the silo. The minister getteth his bit. The editor printeth a death notice, two columns of obituary, three lodge notices, a cubit of poetry and a card of thanks. And he forgetteth to read proof on the head, and the darned thing cometh out "Gone to Her Last Roasting Place."

And all that are akin to the deceased jumpeth on the editor with exceeding great jumps. And they pulleth out their ads and cancelleth their subscriptions and they swing the hammer unto the third and fourth generations. Canst thou beat it?

POSTAL SAVINGS.

Arrangements Made that Enables All Persons to Open Accounts.

Every person in the United States ten years old or over may open an account in a postal savings bank after July 1st, according to an instructive leaflet on the Postal Savings System just issued by Postmaster General Burleson.

This important extension of the service will be made possible by permitting persons living in communities so sparsely settled as not to justify the designation of their local post offices as regular postal savings banks to open accounts by mail.

Governor Dockery, Third Assistant Postmaster General, who has direct supervision of postal savings, was so impressed by appeals from all over the country to open postal savings accounts by mail that he took up the task some weeks ago of working out a feasible and safe method for meeting a demand well illustrated in a letter from a Saline County Missourian, who resides many miles from a postal savings bank.

"Having a few hundred dollars saved from fifty years of hard and assiduous labor and skimping economy on the part of my wife and myself, we concluded to deposit it in the Postal Savings Bank of —. We wrote to the postmaster at that place and received reply to the effect that none but patrons of that office could deposit in that office which is very disappointing news to us. Our little farm is not large enough to support us and land is so high that it is impossible for us to buy more with what little we have saved and we are so old that we can't labor much now and we would be so glad to lay by at least enough to put us away in decency."

THE NEW PLAN.

Under the plan adopted by the Postmaster General for opening accounts by mail an intending depositor, residing where there is no regularly designated postal savings bank, will apply to his local postmaster who will see that necessary identification data is prepared and forwarded to a nearby post-office authorized to accept deposits.

The intending depositor will then be given permission to forward his first and subsequent deposits by money order or registered mail direct to the postmaster at the banking point for which receipts or certificates will be issued. He may withdraw all or any part of his postal savings by mail and on demand together with any interest that may be due him.

CHILDREN MAY HAVE ACCOUNTS

The new leaflet points out that any person ten years old or over may open an account in his or her own name; that an account may be opened by a married woman free from any control or interference by her husband; that postoffice officials are forbidden to disclose to any person, except the depositor, the amount of any deposits; that withdrawals may be made without previous notice; and that the Government guarantees to repay all deposits on demand with accrued interest.

Postal savings receipts have broken all records the past year. During the eight months prior to April 1st there was a net gain in deposits of \$19,000,000, as against a gain of \$8,000,000 for the same months the year before. Thousands of new accounts have been opened and the millions made up largely of hidden savings have been turned back into the channels of trade just at a time when there was pressing demand for every dollar.
